**JUNGHEINRICH**  
*Well worthwhile*

**JUNGHEINRICH**

# Why choose Jungheinrich for your racking and storage systems?

## 1. Jungheinrich Group - A market leader

Jungheinrich Group is a Market Leading force in Materials Handling Solutions. The Group employs some 10,000 people and has direct operations in 31 Countries. Group Turnover is in excess of €1.7 Billion.

The UK has 800 employees with a Turnover of £130 million. Our organisation offers a stable proposition giving you the peace of mind that you would expect from dealing with a Market leading Organisation.

An organisation that is here to stay.

## 2. A Wealth of Experience - At your disposal

Jungheinrich was founded in 1953 and offers you over 50 years of Material Handling Experience.

Racking & Storage Systems have formed a core part of our portfolio for over 20 years.

In addition our partner organisations have over 45 years of expertise in the design and manufacture of these systems.

This is a partnership that is built on success. A partnership that ensures that you get the right product for the right application, on time, every time.

## 3. Total Solutions Capability - Everything from one source

At Jungheinrich we hold a unique and enviable position in the marketplace. The ability to provide all aspects of a Materials Handling Solution from a hand pallet truck through to fully integrated Systems.

We offer the most comprehensive range of equipment including the complete range of Racking and Storage Products.

We can tailor make the solution to meet the specific requirements of any application.

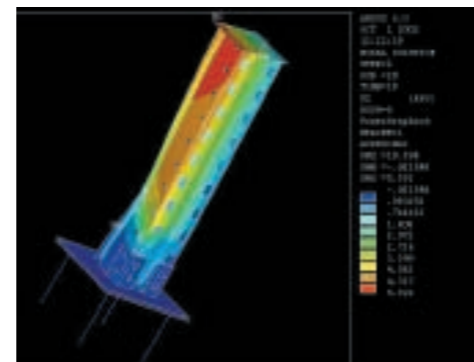

Everything from one source ensures that all critical design and interfaces are fully met to provide the optimum solution.

## 4. State of the Art Design - FEM is the future

Jungheinrich prides itself on designing and implementing solutions to the highest and most relevant industry standards.

We believe that only the most robust standards are good enough – and this means FEM.

FEM codes of practice are state of the art and designed to be future proof. Designs to this standard give you the peace of mind that you are complying with the most relevant standards in the industry and are protecting your organisations investment and reputation.

## 5. Research and Development - An evolutionary process

The constant challenge for development and innovation requires specialist resources.

Along with our partners we have developed a state of the art R&D facility employing more than 20 dedicated professionals to carry out "In house" design and testing of products. This ensures that our products are at the forefront of technological design.

## 6. Quality - At all stages of the process

For quality to be worthwhile, it has to flow through every part of the process, from design to manufacturing and sales to aftersales.

At Jungheinrich our accreditation spans all areas of our operation. We hold ISO 9001 Quality Management certification, as well as OHSAS 18001 occupational Health & Safety Management Systems. We take the environment seriously too and hold ISO 14001 environmental Management Systems. We are also proud to recently be accredited with PAS 99:2006 for Integrated Management Systems, one of the first companies in the UK to achieve this prestigious standard.

Quite simply quality from start to finish.

## 7. Installation & Project Management - Our commitment

Aware of the high importance that each installation process bears, we provide you with the most professional installation management teams in the industry.

Whether working on greenfield sites or within existing facilities, our dedicated expert resources will ensure that the installation complies with all the relevant industry standards whilst coordinating the site activities in a controlled and safe manner.

If required we can offer the full range of services to comply with the Construction Design and Management Regulations, giving you peace of mind for all aspects of your installation.

## 8. Peace of Mind - Guaranteed

As standard we offer a 2 year warranty against defects in quality. In addition, also as standard, we offer a 5 year warranty against the steel structures of our racking systems.

## 9. Whole Life Costs - A key consideration

Here at Jungheinrich we believe that consideration should be given not only to the initial capital investment of the system, but also to the whole life costs of the solution.

Robust, well designed equipment is essential in this regard. But more importantly it is the interconnectivity and the way in which the system components interact that will ensure reliable, solid operation throughout the life cycle of the system.

The combination of state of the art R&D facilities and the rigorous adherence to FEM standards of design allow us to produce systems that are resilient, reduce damage and therefore costs over the whole life of the system.

## 10. Professional Account Management - Supporting your every need

Once the system has been commissioned the real work begins. Handover signals the start of the operational life of the system – the reason you made the investment in the first place.

As your operation develops, we will be there supporting you every step of the way, offering support and advice on best practice within the industry.

As your materials handling partner, we will work with you ensuring that your systems are congruent with the strategic objectives of your organisation.
